The Committee appraised the proposal based on Form I, Form IA, conceptual plan, EMP, site inspection report and all other connected records. The Committee observed that the plot is located within 100 m east of the Sreekaryam Junction where NH 66 is intersected by Pothencode - Akkulam road. It is highly congested due to heavy traffic along both roads. Turning radius is very less due to lack of adequate splay. Bus stop for the vehicles bound for Central Business District is located in front of the plot. Vehicle trips leaving for CBD and coming from Kazhakkootam can be easily manoeuvred but traffic in the opposite direction will create conflict points along NH which will accentuate traffic congestion experienced now at the junction. The proposed project, unless PWD intends to ease the traffic congestion in the near future, will only make the situation worse to worst. In the light of the above facts the Committee decided to recommend to reject the proposal.
